

TITLE OF THE MANUSCRIPT

M.Mustermann^{1*}, A. Mustermann¹ and C.D. Mustermann²

¹ Department of ..., Institute of ...,
Organization/University, Address

² Department of ..., Institute of ...,
Organization/University, Address

* Correspondent author: m.mustermann@uni.de

STRUCTURE/LENGTH/SUBMISSION

You are recommended to use this MS Word template to prepare your manuscript including your bibliography. In case you have any problems or questions regarding this template please contact the chair of the paper review committee Prof. Amsini Sadiki (email: sadiki@ekt.tu-darmstadt.de).

Please divide your article into clearly defined section (e.g. **Abstract, Introduction, Methods, Results, Conclusion, Acknowledgment**). Thereby, the length of the manuscript should preferably not exceed the maximum limit of six pages and the abstract should not exceed the maximum limit of 300 words. The authors are further requested to provide and acknowledge all relevant funding sources in the submitted manuscript.

For submission, build a PDF of your manuscript on your computer and bundle all manuscript source files including figures into a single archive (e.g. ZIP-archive, TAR.GZ-archive). Figures should be submitted in one of the following formats: EPS, JPG, PDF or PNG. Send the single archive file and the PDF of your manuscript to (email: sadiki@ekt.tu-darmstadt.de). Deadline of submission is July 25, 2019. In the following some details about some specific items are provided.

TITLE/AUTHOR(S)

The title of the manuscript should be concise and informative. Please avoid any abbreviations and/or formula in the title where possible. Titles should not exceed the maximum length of four lines.

Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled and that the order of the authors listed in the manuscript is correct. Add the authors' affiliation address below the names and provide the full postal address of each affiliation. Please clearly indicate the correspondent author.

ABSTRACT/INTRODUCTION

Abstract should state briefly the purpose of the research, the principal results and major conclusion. References and uncommon abbreviations in the abstract section should be avoided. The abstract should preferably not exceed the maximum limit of 300 words.

Please provide an adequate background in the introduction section including the objectives of the work. Thereby, avoid a detailed literature survey or a summary of the results.

EQUATIONS/TABLES/FIGURES

Equations should be centered and numbered consecutively, using Arabic numerals enclosed in parentheses and positioned flush right along the final baseline of the equation. You can add an equation as

$$erf = \frac{2}{\sqrt{\pi}} \int_0^x e^{-\tau^2} d\tau \quad (1)$$

All tables should be numbered consecutively and captioned above the table. Table 1 shows an example of a table.

Table 1: This is an example of a table

	ψ	φ_i	Z	Π
mass	ρ	--	--	--
momentum	ρU_i	σ_{ij}	ρf_i	--

Please make sure that all figures, graphs and line drawing are in an acceptable format (EPS, JPG, PDF or PNG) and of high quality. All figures should be numbered consecutively and captioned below the figure. Figure 1 shows an example of a figure.

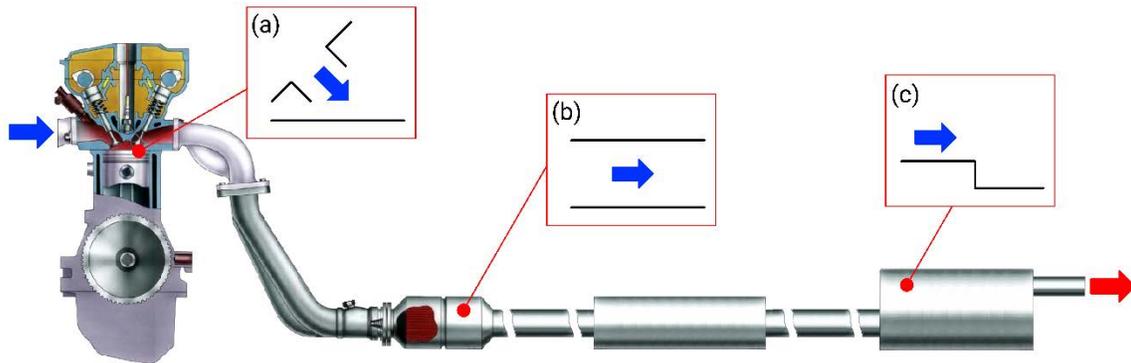

Figure 1: Example of a figure

REFERENCES

Please ensure that every reference cited in the text is also present in the reference list and vice versa. You can reference to a paper in proceedings [1], to an article [2], and to a book [3]....

ACKNOWLEDGEMENT

Please list here all sources of funding.
